FOR IMMEDIATE RELEASE

V-COMM COMMISSIONED AS TEST VENDOR FOR CTIA IN RESPONSE TO PROPOSED FCC 600 MHZ MANDATE

Cranbury, NJ (February 5, 2015) — On Feb 4, CTIA- The Wireless Association filed comments with the Federal Communications Commission (FCC) concerning its 600 Megahertz (MHz) proceeding. V-COMM played a vital role in this proceeding as CTIA's appointed test vendor.

V-COMM tested mobile broadband services to measure the impact of unlicensed white space devices and wireless microphones in the 600 MHz duplex gap and guard bands.

Based on V-COMM's extensive testing and analysis, CTIA offered the FCC a clear understanding of 600 MHz band interference to modify the Spectrum Act's mandate on unlicensed operations and ensure the protection of licensed services from interference.

"We were pleased to be chosen by CTIA to perform this important testing," said Dominic Villecco, president of V-COMM. "This testing in the comments provided by CTIA will help shape the future of spectrum utilization for the wireless industry."

V-COMM is a leading provider of integrated network engineering, radio frequency engineering, and business services, with offices in Cranbury, New Jersey and Exton, PA. V-COMM delivers the needed expertise and cost-effective solutions to governmental agencies and wireless operators. V-COMM also provides design and design/build services for In-building, In-tunnel and other wireless telecommunications networks. For more information, visit our website www.vcomm-eng.com.
